

My Tassie Devil Stall August 2009 Zali Gude

I turned 8 during my trip to Tasmania in January 2009. One of my favourite spots was East Coast Natureworld where Devil Island Project started. I loved the animals and how friendly the Tassie Devils and wombats were. The facial tumors are awful and painful for the Devils. We must protect them from extinction. I live in Ipswich Qld and think we can all help wherever we are, I have been working on this project since I got back. Thanks to all my neighbours I have raised \$269 to help with fencing for Devil Island.
